Press Release

Montreal, 17 November 2008

SWISS to enhance route network from Montreal in cooperation with Air Canada

Beginning June 1st, 2009, SWISS customers will enjoy the convenience of non-stop travel between Montreal and Geneva as a result of a code sharing agreement with Star Alliance partner Air Canada.

Flight AC830/LX4643 will depart Montreal each day at 20:45 and arrive in Geneva at 10:05 the next morning. The return flight will depart Geneva at 12:15 and arrive in Montreal at 14:30. The new service will be operated using a 211-passenger Air Canada Boeing 767-300 ER aircraft featuring a choice of Executive First and Economy class seating.

The new codeshare agreement with Air Canada will allow SWISS to expand the company's route network from Montreal and provide a direct link to the French-speaking regions of Switzerland, with convenient onward connections to centres in France such as Lyon, Grenoble, Dijon and Annecy.

SWISS customers flying on this new route will be entitled to earn and spend Miles & More loyalty program miles.

Operation of this new route is subject to government approval. Tickets are available for purchase from today.
