

SWISS traffic figures

April 2006

SWISS maintains seat load factor at high level

SWISS achieved a seat load factor of (SLF) of 80.7% in April, 1.3 percentage points more than for the same period a year ago (79.4%). On intercontinental routes SLF was a strong 83.9% (previous year: 85%). On European routes SWISS improved SLF for the 16th consecutive time: SLF for April rose by 6.4 percentage points to 74.2%. SWISS carried 903,247 passengers on scheduled services, a 7.2% gain over April 2006.

On *intercontinental routes* the SLF for April 2006 was 83.9%, or 1.1 percentage points lower than the level for the same month a year earlier (85%). Capacity in terms of available seat kilometers (ASK) stood 1.7% above the prior-year figure. The number of revenue passenger kilometres (RPK) climbed by 0.4% during this period.

On North Atlantic services, the SLF was 86.5% (previous year 87.6%). A decline of 2.6 percentage points, to 85.2%, was recorded on Far East routes (previous year 87.9%). Services to the Middle East enjoyed a 1.1 percentage-point increase to 80.7% (previous year 79.6%). South America services had a seat load factor of 80.6% (previous year: 86.2%), while flights to Africa increased their seat load factor by 2.3 percentage points to 77.1% (previous year 74.8%).

SWISS improved its April seat load factor significantly on *European routes*. A gain of 6.4 percentage points produced a seat load factor of 74.2%. Having increased available seat kilometers by 3.4%, SWISS was able to achieve a 13.3% improvement in revenue passenger kilometers.

The demand-driven adjustments to the European fleet that were begun in 2005 combined with intensive marketing and sales-generating measures are continuing to have a positive impact at SWISS. For the 16th consecutive time, SWISS increased its seat load factor on European routes. The marked improvement in Europe reflects the influence of Easter holidays falling comparatively late this year.
